Subject: UCure testimonial

Thank you for offering the UCure iodine product. I have been using it for about a week now. I have used the spray inside my mouth, aiming it at my gum-line in sensitive parts of my mouth, because I have slightly irritated gums. I think it's helping, but the real test will be when I see my dentist in mid-November.

As normally happens, when the weather starts turning colder and I go outside, my nose gets the sniffles. I noticed that early this week, and applied one spritz to the roof of my mouth, and the sniffles are gone. I now do one spritz a day to the roof of my mouth as well.

I am also using the product in lieu of toxic underarm deodorant. It eliminates my underarm odor immediately. I spritz my underarms and rub it in by rubbing the undersides of my shoulders against my underarms and also sometimes also using my hands to rub it in.

It is also a great hand-sanitizer. My hands smell clean after using it.

Feel free to share any part of this or all of it on the testimonials page(s) of your website or elsewhere.

All my best,  
Michael Kafes
