Subject: Re: Information

Note: The following testimonial is an opinion and not to be construed as medical advice or diagnosis - for educational purposes only.

"I have used various brands and forms of iodine with my patients over the years with varied results. I find the UCure A9 Pathogen Eliminator atomic iodine product available at [UCure9.com](https://www.UCure9.com) works best overall. The UCure 9 product has properties I have not found in other brands or forms of iodine including nascent, atomic, prolamine, or potassium. One quality of the UCure 9 iodine is that helps to relieve pain when sprayed directly on the affected area. It starts the tissues releasing the swelling of the trapped lymph fluid (edema) and this can release pressure on the nerve that registers pain. It also seems to increase cellular metabolism on site. I theorize this may be due to converting RT-3 to T-3 as results can be seen in under 1 minute. This speed indicates individual cell receptor functional exchange. More research is needed to determine if it is a displacement or chemical convergence causing the effect. One other unique effect is that I have witnessed a goiter shrinking in less than a minute when sprayed directly upon it. This product is a mainstay in my healing arts practice.
