Subject: Addendum Testimonial - UCure & Corona Virus!

This is Carol Haworth, and I wouldn't mind adding to my testimonial. My husband is 74 years old and diagnosed with COPD. When I first noticed symptoms, I treated him with the U-Cure also. We both took colloidal silver and Olive Leaf extract, as well. At the time we were in a one bedroom apartment, and slept in the same double bed. He didn't even GET the virus. I find that to be rather remarkable!
