

September 12<sup>th</sup> 2021

Thank you so much! I love this stuff. Really protects you.

I am not vaccinated not only because there is not being enough research in this matter and I have been immune compromised.

To me, this is a heaven sent product. I take it with me whenever I leave the house and whenever anyone enters or leaves my home.

Thank you so much for bringing it on the market for all to share for our well-being. I use it on everything from cold sores to cuts and insect bites. It reminds me of that Greek Movie where the Dad would use Windex for everything. 😊

Thank you again.
