

Dear U-Cure,

THANK YOU!

The product assisted me in promptly healing / avoiding a sty on my eyelid.

Recently, I spent the night in a hotel then awoke to the unpleasant reality that my eyelid and right cheek were reacting adversely to the products used to clean and sanitize the bedding. The U-Cure product was at hand in my purse. With a few applications, within a few hours of time the reaction had quelled. The emerging "pimple" of a potential sty had reversed. With continued application every three or four hours that day, I awoke the next day to fully recovered normal skin condition!

This testimonial is presented so that you may share my positive experience with others. I do hope that your other customers are experiencing similar positive results to the U-Cure product's assist to the body natural healing systems.

Also - there was no sensation for me other than a pleasant liquescent/clear mist when I applied the product.

Very best wishes to your team and much gratitude!

DJK
